

Abstract of the Disclosure

At the time of a backup process of the sharing disk
in a disk shared file system, the write cache of each
5 computer is reflected on a sharing disk, and data of
the sharing disk is copied in a backup medium as a batch.
Further, blocks to be backed up are listed to be copied
in the backup medium as a batch. Then, the log of each
computer is stored in a log medium, and the data at the
10 start point of a backup process is formed using the log.
